Dr. U.Kamachi Mudali, Chairman & Chief Executive, HWB and Shri Debashis Das, Chairman & Managing Director, ECIL signing MoA.

HWB and HWPs are using Integrated Information System (IIS) since 2003-04 for automated applications in Human Resource, Finance & Accounts, Stores & Inventory and Maintenance Management System. As the system was developed in year 2003, there is no support for Hardware, Operating System and Oracle Database due to obsolescence of technologies. In addition,over the years, there is a requirement for modifications in the system for additional features like Bi-lingual support, Centralized IIS, Web based application and integration to DAE Integrated Management Information System (DIMIS) etc. In view of this, HWB has decided to develop a new IIS System to meet the challenges and demands mentioned above. A new IIS is aimed to establish the system for business process automation in areas viz. Administration, Finance, Accounts, Maintenance, Stores Inventory, Purchase, Projects and Safety along with MIS to achieve Less paper office in HWB & HWPs and support management functions of HWB and its Plants for information dissemination within HWB & HWPs. HWB has signed Memorandum of Agreement (MoA) with Electronics Corporation of India Limited on 31.10.2017 for Development and Implementation of Integrated Information System for HWB and HWPs.
